

GLAMORA

Madama Butterfly Collection

GUIDELINES FOR DESIGN
AND HOW TO SEND IN ORDERS

The Madama Butterfly Collection comprises 5 unique patterns with predefined dimensions. Each one is made with a specific combination of elements in different materials and comes with a decorative edging in anodised aluminium to position on the joins. All subjects have a fixed 3-metre height and different widths, making it easier to adapt to walls of different sizes.

To offer maximum design freedom, the Madama Butterfly Collection presents two neutral materials (not shown), GlamPure Plain and GlamSatin Plain, which can be used with the unique patterns in the collection and matched with the decorative metal edging, making infinite personalisation and design options possible.

Composition examples

A. Each pattern in the Madama Butterfly Collection can be used on its own or repeated to created a continuous decoration.

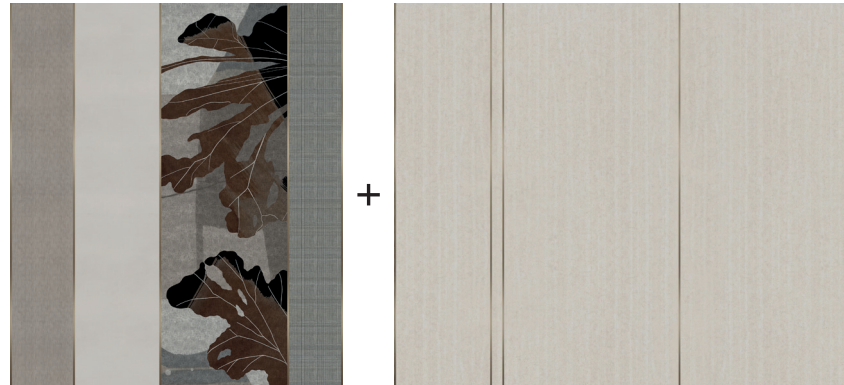

B. The patterns in the collection can be completed either laterally or above and/or below with the two plain materials available: GlamPure and GlamSatin.

Composition examples

C. The plain materials can also be finished with the decorative metal edging on their joins or in other positions, creating unusual visual effects.

D. It is also possible to combine different patterns together to give personalised sequences.

Instructions for ordering

The five patterns in the Madama Butterfly Collection are in stock and ready for purchase, with no need to develop graphic simulations. This means the collection can be accessed very quickly and allows for the creation of unique rooms without the standard technical times for personalised projects.

All the articles in the collection, including the patterns, the plain materials and the decorative metal edging in anodised aluminium can be purchased on their own and can be ordered by sending in the code and quantity of articles desired, no need to send wall dimensions.

Madama Butterfly Collection wallcoverings are always supplied complete with adhesives and decorative profiles.
